

Maine companies of all sizes are turning to the cloud and the valuable services that it offers, for many reasons. In fact, various industries are migrating to the cloud at a rate of over 30% per year.

Because your business's needs are not only critical to you, but also to your clients, Maine Technology Group offers a variety of state-of-the-art cloud offerings to help increase access to your data. From simply storing your data in the cloud to hosting your business's entire infrastructure in the cloud, we have the right solutions to fit your needs at an affordable rate.

HOSTED APPLICATIONS

Have your software and data wherever you go and on any device.

Anywhere you are. The power of a dedicated workstation coupled with the convenience of using any device. Yep, that's MTG desktop at your fingertips.

Reliability. With our Cloud Platform, you are guaranteed more up-time and reliability than an in house solution. 24/7/365 and 99% uptime sets the standard for any company's need.

Enhanced Security. We use the latest security technologies to ensure that your data is protected from both physical and online threats.

VIRTUAL SERVERS

The perfect environment for your critical systems...all with virtually no down time.

Never grow old. Want a better alternative than budgeting thousands of dollars for new servers? With our Cloud Server Solutions, you never have to purchase an outdated piece of equipment again.

Flexibility. If your business's needs increase or decrease over time, you can simply scale up or down to pay for what you need.

Invest in your Company. The most profitable businesses are those that allow technology to touch all aspects of it. Team up with MTG as your Managed Services Provider to meet the demands of your business. We're here watching, 24/7.

DATA STORAGE & BACKUP

We manage both local and cloud-based backups so your data is always safe.

At your fingertips. Never worry about your data again. With our data storage and cloud backup solutions, your data is only a click away. Simple, reliable and secure.

In your hands. Your backup plan is under your control so the right data is always in the right place. Whether locally or in the cloud, your data can survive any disaster so it's with you no matter what.

Security. No matter what industry you are in or compliance regulation you may face, our storage and backup solutions meet even the strictest of standards.

BUSINESS CONTINUITY (DRaaS)

Hackers, cyber-terrorists, natural disasters and manmade disasters are no match for the Cloud.

Rapid recovery. With our DRaaS solution in place, you'll never have to worry. Restoration from a disaster to normal operation takes only minutes.

Save your resources. With our scalable virtual infrastructure, you'll have little to no hardware and software expenditures. We'll be your resource so you can put that money to more important use.

Flexibility. Now you can select from a variety of recovery options, all depending on the type of disaster. Pick your plan, depending on your need and your budget.

UNIFIED COMMUNICATIONS (UCaaS)

Allow on-site and remote users to collaborate seamlessly between devices and platforms with Unified Communications.

Get better access. With our cloud based solution, users can now have access to communication tools whether they are at your company location or working from home.

Centralized Management. UCaaS takes away much of the premises-based management challenges and administrative functions. Now, one change takes care of a company wide task.

BYOD. Bring your own device is finally here! 4 out of 5 CIO's today have embraced consumer technologies in the workplace. Lower your cost and tighten your control with our UCaaS solutions.

DESKTOP AS A SERVICE (DaaS)

Embrace a mobile workstyle by utilizing the Cloud to access business applications and desktops on any device and in any location.

Compute easier. Bringing on new employees should take minutes not weeks. DaaS gives your company the ability to have all necessary desktop applications and resources at lightning speed, on any device.

Financial advantages. Moving to our DaaS solution not only eliminates costly licensing, but the time it takes to deploy this migration.

Security. Security breaches often take place at the edge of your network. Since our DaaS infrastructure resides in the cloud, it is a safer, more secure option.

INFRASTRUCTURE AS A SERVICE (IaaS)

Reduce IT complexity, obsolescence, and costs by moving your IT infrastructure to a virtual environment.

Expand as you grow. IaaS allows you to scale as you grow or even scale back. No more buying expensive equipment that you may or may not ever use to its full capacity.

No capital investments. Our IaaS solutions are offered as a "pay-as-you-go" subscription-based plan that allows you to only pay for what you need to. No more capital investments that are outdated before they're installed.

Get started immediately. Our IaaS solutions are already in place, which means that your organization can get your company's infrastructure environment up and running in the cloud immediately.
